Assessor Comments	A line of young properly bred Angus Females PTIC to a Bongongo Angus Sire to commence calving the end of October. Cows are rising 3 years and have raised 1 calf and were sourced directly off Bannaby Angus . These females have been running on Native grasses and supplemented with some Lucerne hay and will present in Store condition. Cows have done a nice job raising their calves which were weaned off them only 5 weeks ago. These females are showing the effects of a couple of tough seasons but given the opportunity will flourish into nice line of matrons.
