Assessor Comments	13 Angus heifers PTIC to Leading **WAGYU** genetics, represented in Trent Bridge TBRFQ509 (see documents) , 6 to 16 weeks, and stand on very well grown frames, with an average liveweight at assessment of 465kg. A fantastic opportunity to secure Heifers in calf to highly sought-after genetics, in a promising F1 market. TBRFQ509 is a promising young Trentbridge sire with calves on the ground standing on good bone and showing good growth. A depth of breeding in this bull with a top 5% for marbling and top 1% for Eye muscle. The Vendor would welcome the opportunity to buy back the progeny out of these heifers if the situation arises.
