Vendor Bred	Yes
Lifetime Traceable	100% of cattle in this lot are Lifetime Traceable
Grazing Conditions	Improved pastures and supplementary hay Returned same
Burr/Seed in Coat	No Burr or Seed of weeds declared noxious observed in the coats at assessment
HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives
Vendor Comments	A genuine line of quiet, vendor-bred cows that are easy to work with and have consistently raised quality vealers. The vendor would normally retain these females, however they are being offered due to a change in farming direction.
Joining Details	Station Mated - Continuously Joined Bull Breed(s): Angus
Preg Tested?	Yes, this lot was pregnancy tested, by Andrew Maudsley (Vet) on 11/06/2026.

	33 Head (100%) PTIC, from 5.5 to 7.5 months (at time of assessment 09/06/2026). Certificate Available.
Pregnancy Terms	No Pregnancy Terms apply.
Other Joining Details	Joined to Leawood bulls

Temperament

Yards	Crush	Paddock
Quiet: 30 head Slightly Stirry: 3 head	Quiet: 28 head Slightly Stirry: 5 head	Quiet: 33 head

Cattle were walked through the yards for assessment and mouthed. A few cattle objected to the mouthing process; however, once returned to the paddock they settled immediately, showing no signs of stress and stopping to eat hay while photos were being taken.

Handled With	Bikes , Dogs , On foot , Vehicles
Assessor Comments	**33 PTIC F1 Angus Cows** The vendor presents a quality line of 33 PTIC F1 Angus cows that represent his complete F1 maternal herd. These proven vealer mothers range from second to fourth calvers and have consistently produced quality Angus-sired progeny. All cattle are vendor bred, with the cows bred from the vendor's own large-frame dairy herd, creating productive, high-capacity F1 females with strong maternal traits. The cows are PTIC to quality Leawood Angus bulls and are due to calve from 1 August to 30 September, offering buyers a compact spring calving program backed by proven Angus genetics. All cows were mouthed at assessment, with 19 head identified as 4–6 tooth and 14 head as 7–8 tooth. Cattle were handled through the yards for assessment and, while a small number objected to the mouthing process, they settled immediately upon return to the paddock and showed no signs of stress. An excellent opportunity to secure a genuine line of productive, vendor-bred F1 females carrying their next Angus calf. The vendor would normally retain these females; however, they are offered as a complete dispersal of the F1 maternal herd due to a change in enterprise direction.
Assessor	**Travis Sutton (Level 1 Accredited)**
Delivery Period	20/06/2026 to 27/06/2026 (8 days)
