	cows were all handled at assessment they walked through the race and crush well with out applying to much pressure to allow them to flow through easily. Vendor handled Cows at assesment into the force generally cows were good to handle. notable that three heifers moved around in the yards more freely than the balance.		
Handled With	Bikes , Dogs		
Assessor Comments	Offered are PTIC seconder & third calving cows. These cows do not suit the vendors current operation hence the sale of them. A combination of Droughtmaster, Bos Indicus, British & Euro cross these cows are safely preg tested in calf to the Angus bull. The calves these females produced this year are currently growing out very well, and these cows should continue to produce nice calves in the future. Please note some cows look very forward in calf and will only be loaded with in the guidelines of the fit to load standards.
