Handled With	Bikes , On foot , Vehicles

Notable Traits

	Traits
1 Head	Old pink eye scar

Assessor Comments	A genuine opportunity to secure a complete herd dispersal of quality Angus females with February/March-born Angus calves at foot. This line comprises 38 cows with 38 calves at foot, with the cows rising 5 years of age and carrying their third calf. These medium to large-frame cows were purchased as one mark of Weeran Angus heifers in 2023 and have since been developed into a productive, fertile breeding herd. Rejoined on 26/04/2026, they present as a potential 3-in-1 unit, with bulls still running with the cows. No expense has been spared on sire selection, with the vendor consistently sourcing bulls from the pointy end of the Murdeduke Angus Bull Sale, including purchases of up to $32,000. This commitment to elite genetics is reflected throughout the herd, delivering fertility, consistency, growth and market appeal. Fertility is a standout feature, with these females consistently calving within a tight 8-week joining period. Calves have been marked and vaccinated, adding further value to this offering, and every cow and calf can be individually matched and identified. Their Angus progeny have consistently sold through the Feature Birregurra Weaner Sale and are highly sought after by repeat buyers. An outstanding opportunity to secure proven Angus breeders with calves at foot, backed by elite genetics, strong fertility and market-proven performance. Please note the vendor also offers an additional two lots in this complete herd dispersal.
