Assessor Comments	This is the first of 5 lots offered in this sale by the vendor. The cattle are bought in primarily to feed on, however some may have been bought in as PTIC. Some heifers are identified as pregnant on the farm and removed to calve down. As the cattle are bought in, we cannot guarantee the provenance of breeding on either the cows or the calves, so all descriptions are best guess. These cows have been running with a Black Limousin bull. This lot were drafted out as the younger Angus types, and are assumed to be first and or second calvers, two were mouthed and found to be 4 and 6 teeth. The cattle are in store condition running on short feed and hay, and represent a good trading opportunity and will be priced accordingly. Given room and feed there is no reason they shouldn't go ahead. 3 heifers show some blue eye, see photos of 2 of them. One calf has a spot in both eyes.
