Vendor Comments	Annual draft of surplus ewe lambs			
Joining Details	Not Station Mated			
Any Access To Rams or Stags?	To vendor's best knowledge, this lot has had no access to rams or stags.			
Assessor Comments	200 composite ewe lambs, all weighed 28-38kg full. They were dropped in June & July, drenched and vaccinated on the 11/10 and crutched on the 27/10. They were weaned at assessment so will have been off mum for 7 to 10 days at delivery. Majority of these lambs were born as twins. A neighbour has recently started trading lambs so these ewe lambs have been drenched with Flexolt for precautionary measures only. For the past 17 years the vendor has only bred from lambs that were born as a twin which has developed an unbelievably fertile flock. In 2025 the ewe lambs scanned at 175% and for the last 5 years the flock has marked 150-155% to ewes joined each year. The ewes are run hard under commercial conditions and all progeny are killed off mum or finished on summer crops and sold to the domestic trade. The lambs are a bit lighter this year due to the lack of clover however given extra protein they will jump away. Each year the maternal wth lambs are killed off mum at 50-58kg. One of the impressive flocks I've witnessed.			
Assessor	**Guy Robertson (Level 1 Accredited)** Phone: 0427 347 098 Parallel Assessed By : Jonathon Coghlan			
Delivery Period	11/11/2026 to 17/11/2026 (7 days)
