Assessor Comments	215 NSM Merino Ewes Acc. Playford Family Farming Trust - June 2024 Drop - Glenelg Blood - September Shorn - Gudair Vaccinated & Mulesed. Regretful sale due to end of lease. All ewes have reared a lamb averaging 120% lambs marked. The Playford family have been using Glenelg Merino genetics for the past 40 years in their breeding program. Ram selection is a stringent process where large frame & carcass are strong attributes complemented with 18.5/19.5 micron, SD measurement between 3.5-4 & a comfort factor of 99 plus are also key factors. As a 12 month flock average mature ewes cut 6.5kg at 19.5 micron yielding 66.5%. The style of these ewes offers perspective purchasers the option to become an inclusion to a self replacing Merino ewe flock or become prime lamb producers & will do either extremely well. Opportunity to secure outstanding Merino ewes entering the prime of their lives. Highly Recommended!!
