These heifers have had the least handling of the 3 lots listed, grazing a large paddock furthest from the house. They were a bit anxious to handle when drafting off their calves - All having a good block, but being nervous to moved past the handler & draft away from their calves. All led up the race well, 2 that were quite anxious in the crush, pushing on the head bail, rocking & tail flicking. Once back in the paddock they settled when approached. Just needing some more time spent with them.

Handled With	Bikes , On foot , Vehicles

Notable Traits

	Traits
1 Head	White splash on the udder/flank

Assessor Comments	Exceptional line of young females. Bred by the Hearn family from Morven NSW, carrying 25+ years of pure Rennylea Angus Blood. These heifers were originally part of the Hearn's 'keeper draft' only being sold due to a high conception rate in their A.I program. Conceived in the first round of natural joining and all calving within 2 weeks, giving a very nice even drop of calves at foot. This is a lovely line of young mothers with everything is right about them. Structurally correct, with a very long, deep, soft maternal barrel on them. Carrying a very good supply of milk and doing an excellent job with their young calves, all looking fresh, sappy and loved. These soft, pretty faced mothers have a very easy doing style about them and would improve most existing herds or be the pinnacle for a starting point to build a herd from. Buyers please Note. Although these heifers were a bit more anxious, it needs noting that they have had the least amount of handling and exposure, and would be different cattle with a bit of time and handling put in to them. Vendor has 3 lot's alike in the same sale giving buyers an opportunity to put together 29x29 Pure Rennylea Breeders. *Being sold in their paddock lines - Drafted prior to calving to help with feed management & mothering.
