	Traits
1 Head	Old pink eye scaring in one eye, resulting in a full blue eye.

Assessor Comments	A good even line of young four to mid age seven year old large framed Angus cross PTIC cows that are due to calve in the Autumn. Cows have come through a very tough winter period, an early weaning program along side a feeding ration twice a week have seen cows come through this period very well, stay in calf and are in good stead to continued moving forward given the right opportunity. Cows are due to calve from early march to early may, joined to quality Merilba South Devon bulls.
