Assessor Comments	A nice line of 11 young Droughtmaster/Blonde Aquitaine cross heifers preg-tested for their first calf to Speckle Park bull ADELSON KALEB Q24 and commercial speckle park bull. Heifers were preg-tested to be 3.5 to 6 months in calf. These are a nice line of breeders showing good femininity and bone structure, with great growth for their age, averaging 445kg at assessment. These heifers have their entire breeding life ahead of them and should produce quality progeny for years to come. Heifers showed a quiet nature with a couple getting agitated when under pressure going up to the race. It is worth noting they were preg tested and vaccinated the day before assessment and still flowed through the yards and crush with ease. A few heifers showed some slight muscle soreness which can be seen in the video. This is only due to receiving two vaccines the day prior. Vendor has another lot in this sale.
