	5 Head touch of white							
Assessor Comments	These well-handled heifers were exposed to bulls from 27/8 to 8/10 but were pregnancy tested non-detectable. The Heifers are top quality well bred and have not had a set back,. The vendor is putting them on Aplus as opposed to sending them to a fat sale hoping that they may get a second chance. There are 5 head with a touch of white on their bellies or flank and 1 had scarring in 1 eye which was not detrimental. These are a good line of quiet heifers which are of good quality and size. Refer to pictures and video. Please note that these heifers were assessed and weighed 24 days prior to sale date of 21/04/23. Ideal heifers for the feedlot.
