Paddock

Easy cows to manage, a few showed a bit of anxiety in the crush, doing a bit of stomping and wanting to get out again, listed above as slightly stirry. Otherwise good old females that know their way through the yards and gave us no trouble.

Assessor Comments

Good honest cows that have remained in the system by always demonstrating good fertility, and producing a healthy calf every year. Back in calf again and only being sold due to retaining a large portion of heifers as well as having excellent results from preg testing. These are very good mothers that have been consistent in producing calves that meet top end feedlot entry spec's at just 14 months of age. Good heavy cows that present buyers with multiple marketing options. Being 5months in calf to the Rennylea & Dunoon Angus Bulls. Cows that will no doubt produce cracking calves as they have done for years. These are ideal cattle to split, being only 4 months off starting to calve and many prime enough to kill. Please see photos & video for full contentment. Buyers please Note. 2 Cows presented with an eye blemish, 5 with a white flank, 3 dropping in the udder and 1 getting a bit long in one back toe. Not deemed detrimental. Please see photos & video.
