Assessor Comments	"50 Years of breeding", 35 Poll Hereford heifers, sired by Mount Difficult Stud Poll Hereford bulls which have been selected for high growth EBV's. Heifers are 9-10 months old and have been bred out of a cow herd that is selecting females for fertility, temperament and growth. The vendor has been breeding Poll Herefords for 50 years and has been using Mount Difficult bulls for the last 10 years. These heifers are the first draft of the spring heifers and would normally be retained in the breeding herd; they are only being sold due to an increase in ewe numbers. Please note there are four heifers that have a minor pink eye scar.
