Assessor Comments	The annual draft of the Ford's Angus steers. Steers are Llandarlo Angus blood & are 11-12 months of age. They weighed 345kg full at assessment. These steers are showing all the signs of a cold winter presenting in strong store condition. They present as all frame steers that with the weather starting to warm up have the potential for a bit of compensatory gain. This line represents the complete drop of these steers with a small tail removed at assessment. Ideal steers to put a spring on and sell as feeders in the new year or to carry out to heavy bullock. Buyers please note Steers present with ringworm & two steers with old pink eye scarring, not effecting vision.
