|                    | Weaning process still in play. These steers were good to draft and assess. There were approx 10 that moved quicker in the round yard but mainly wanting to exit not advance. The bulk of the steers moved through no problem.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                           |                                     |

| Assessor Comments  | Presenting a tidy line of Angus Hereford restocker steers in store condition. The cattle are well bred by Bongongo Angus bulls showing plenty of depth and length. They present in 2 score condition, very healthy under good management. There is a couple with slight eye blemish from old pink eye, certainly not affecting performance. All were assessed with a low weight of 235 kg and a high of 320 to average 271 kg after 2 hours in yards. A small tail was taken out of these steers but generally they are an even line. They should meet most Angus cross feedlot specs and are an ideal trade article as their weight doesn't do justice to their frame. Please note: Their Angus brothers are being offered in this sale and could help make up trucks. |                                           |                                     |
