	These heifers were pleasured to handle with through the yards and crush. There was only one heifer that pushed a little once in the race and crush. The cows are quiet to handle and these heifers have been handled properly through out the weaning process..		
Assessor Comments	Front Paddock cattle, would suit to be joined up to increase a herd and would not be out of place. These heifers show all the signs of the well breed cattle they are. They show plenty of bone and good colour. This is the complete drop of heifers and could have been kept but have decided to sell. Given the right treatment they should settle and go on for the purchaser. The vendor has handled these heifers through out the weaning process and they are a true representation of their mothers . Their mothers are quiet cattle and are deep barreled cows with great shape and colour. The vendor will vaccinate them with 7 in 1 on delivery. Please call for any further information.
