Steers are typical of being freshly weaned. However were settled in yards and crush. 3 steers were faster through pound / crush, but will settle down with handling, prior to trucking.

Handled With	Bikes , On foot
Assessor Comments	A cracking line of USDA NOP Organic steers. Steers show good length, bone & softness and would grow out into tremendous bullocks or heavy feeders. Well bred steers that are great to handle. There are 3 red steers in the mob from Brangus throwback or Red Angus heritage in a Angus bull. 1 higher content sleek coated Brangus steer. 1 freshly marked steer. Please note, assessor is the vendor of these steers. Steers have had 45mm on them, but aren't bogging around on black soil, they are on a sandhill.
