Assessor Comments	Healthy fresh weaner heifers with good conformation & bone. Properly prepared for the next phase and showing good breed traits. Heifers breeding show potential for performance, provided good feed and management. Heavy Noogoora burr is present on these heifers due their time on oat crop in river paddock. Please view video. An odd heifer with white spot on underbelly or udder at assessment, and two with old wart scars. Two with spots on off eye, one blue. One near eye. Please Note: The assessed liveweight at delivery is for loading - not arrival!
