Comment on Fat Score 1 Cattle

Only 7 head/3% strong FS1. Weaners are growing/loosing milk fat and showed plenty of energy and strength through the yards. Will be suitable to travel long distances and Fit to Load Standards will apply. Buyers transporting over long distances must make their own allowances.

|                    | Northern Bred Brangus, very good to handle through the yards and behaved very well during assessment. Under pressure in the crush odd calf did feel threatened and get agitated, but calmed instantly once back in a bigger yard and mob.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                               |                                     |

| Assessor Comments  | Offering 207 vendor bred - one mark Angus and Simmental Cross Steers. All the hard works been done, this line of one brand steers have been yard weaned since Sunday 30th July and have had education twice through the pound, race and crush. Exceptional wearers to handle and will remain on very good quality hay until delivery. At assessment weights ranged from 154 to 324kg to Av. 234.45kg and have done .7kg per day since branding. Bred by Booroomooka or Outwest Angus Bulls or Lancaster Black Simmental Bulls out of medium to large framed very well bred Brahman X and Brangus Cows. Approx 18 brindles, 17 Slight brindle or red tinge and two baldy faced calves. 70 scurred steers are very very lightly scurred. Vendor also offers 86 Xbred Steers in this same sale. |                                                               |                                     |
