Steers were generally very good to handle, they are typical of station cattle used to big areas that like to run through gateways and got slightly stirry when under pressure In the race. These steers should be no problems for most people with half decent facilities and half decent stockmanship, I would be more than happy to send to most of my clients, however if you want docile cattle these are not for you.

Handled With: Bikes , On foot , Vehicles

Notable Traits

	Traits
2 Head	Very slight blue eye

Assessor Comments: Great opportunity to put together 490 Yammatree cattle into a feeding program that have proven performance from many

	feedlots across the eastern states. This is the second draft of 256 which will be sold as three even runs out the gate of 85 that all in a very tight weight range of 380-440 after an 18 hour curfew, These steers have a lot of frame and are really in spot on condition to feed and should absolutely fly once introduced into a feedlot or grass program. Some of these steers are showing signs of rubbing would recommend a delousing product. There is another 234 heavier steers also in todays sale.
