Assessor Comments	Excellent quality line of Rennylea Blood Angus weaner unjoined Heifers to be sold in two lots of 42 head (84 head in total), all weighed into a tight weight bracket of 278-356kg to average 325kg full at assessment. Bred out of a large commercial herd that has used the top end Rennylea genetics since 2010 (see attached sire links). These are a lovely even line of soft coated heifers with their very quiet temperament being a big feature. These cattle have been recently vaccinated with their first dose of Pestigard enabling the successful purchasers to give them a booster prior to joining for full protection. The herd is recognised for their performance & marbling by feed lotters making these ideal heifers to suit an F1 Wagyu program or anyone looking to improve quality of their Angus herd.
