Temperament not assessed in  
Paddock

The steers were very good handle in the yards and through the race and crush. Three head became slightly agitated in the crush but settled quickly in the yard. In the yards all the steers where very settled. The extra handling from the feeding has made them a pleasure to work and move in and through the yards.

Assessor Comments

A fair to mostly good to very good quality line of vendor bred weaner steers. With medium to large frame they suit to background to the heavy end of domestic feeder weights and then export feeder weights. They have a suitable breed type to then crop of grain finish for a range of high quality markets. They are a mix of Ultrablack and Charalois crosses and had a tight LWR of 230 kg to 314 kg full weight and have been on grain pellets and hay feeders since weaning. No active pink eye was noted but the yards and surrounds were dusty and cattle will be rechecked prior to delivery. Note three head had been ringed approx 4 weeks ago and have dried up. They show a small amount of SMSC in the pizzle and tail but should grow out no issues - they are not staggy. The steers are located right on the Leichhardt Hwy between The Gums and Moonie and would work in with trucks moving north and south. Please note nominated delivery days to allow redrafting prior to delivery.
