In general they are free moving & require steadying through gates, the pound & race with 21 quick off the scales through the side gate & agitated if cornered however if handled quietly respond in kind. Free moving when walking through the yard for photos showing normal flight zone. The Mt Cornish cows are quiet & well handled. By sale day the steers will have been on Anipro supplement for 4 weeks. Assessor Comments	Good quality Santa & Santa cross steers from a large frame herd of quality Santa & Santa x cows. The steers are large frame in store condition offering a tremendous opportunity to add weight to frame. I would expect these cattle to freshen and turn around very quickly on feed. The Mt Cornish herd are noted performing cattle having infused top quality Santa genetics over large frame quality Shorthorn cows over many years targeting the feeder and weaner market.
