Assessor Comments	A small line of PTIC Angus and Angus Charolais cross heifers that offer a great opportunity to capitalize on a depressed market with some young females that have their whole breeding future ahead of them. The Accalay Heifers are from a herd with a base of Glen Morgan and Palgove Charolais genetics. Heifers are due to finish calving between now and to mid January, unfortunately the agistment period has come to a end and these heifers must be sold. Heifers are in calf to the Glen Morgan Angus bull. Please see the earlier calved heifers in this same sale with calves at foot.
