Assessor Comments	As the forecast for rain gets closer and closer this is a line of young females with calves at foot that offers a huge margin to made once the season breaks. A great opportunity to capitalize on depressed market with a cow and calve unit that is set and forget, all the hard work has been done. Heifers are in store condition as they are putting every thing into their calves in dry seasonal conditions. heifers are on their first calf as they are rising three years, calves are sired by a Gates Performance Genetics angus bull with very high IMF figure of 5.1. Given a rising plain of nutrition heifers should grow and fatten into good medium to large frame cows. Please note one heifer had lost a calf recently, there will be price reduction on one unit of \$200. Vendor will also transfer NLIS data free of charge.
