Assessor Comments	A lovely quiet line of well bred, predominantly 2nd calver young cows, with 1 x 1st calver heifer in the mob. These young cows are growing out nicely, & are doing a terrific job on the TeMania sired calves at foot. Cows have been running continuously with the TeMania Angus bulls since calving, creating a real opportunity for a rejoining, given the size of the calves at foot. The majority of these 2nd calvers were purchased ex Auctions + out of Wando Bridge Vic from an offering out of the BUSHY PARK herd, as yearling heifers, with a bloodline based on TeMania genetics, with remaining portion bred at Warren on Wiatara Angus bloodlines. These young cows present in fresh, forward condition & are producing plenty of milk, which is evident in the growth rates of the soft square calves at foot. They represent real value with the additional opportunity to have rejoined. A couple of calves present with slight ringworm marks around the head, which does not seem to be affecting their performance.
