These Steers have a tendency to run when first put in the yards. A few did not settle but to be fair we ran them in and started the assessing process straight away. They are Steers that are easier to handle if left to settle first. the odd one played up in the crush but settled after being let go , nothing unusual there. Overall Steers that are easy to handle by experienced operators.

Assessor Comments	A tidy line of well bred Millah Murrah blood Steers that are going forward and are the ideal weight and condition to finish very quickly on grain or grass. As you can see by the video they have the frame , conformation and muscle pattern you would expect from the Millah Murrah blood lines. The breeder has selected bulls on type not price and this shows through. Four have bald patch's around the eyes that is a reaction to the hay they are being fed.
