Assessor Comments	Quality, well bred 2 yr old heifers presenting in forward store to fat condition with sappy Angus CAF. Heifers are lactating very well with plenty of milk. These came through some pretty ordinary weather conditions during winter, however they have thrived on some higher quality feed and better weather conditions during spring. Only being sold due to being a bit later calving than the rest of the herd. Everything has been done right here being joined to specially selected LBW Dunoon bulls and all calved unassisted. Focus on LBW, calving ease, EMA, IMF.
