Notable Traits	Traits 6 Head Light wart around face - clearing up.		
Assessor Comments	A quality line of 42 x Aug/ Sep 2022 Drop NSM Bongongo Blood Angus Heifers. Offered to the market as surplus to the 'Biroon' breeding program and suitable to join to Angus or terminal sires. The heifers are medium to large frame and in fresh store to forward store condition and performing well on drying off improved pastures. Suitable to join or feed on. The heifers have not been joined and were pregnancy tested 'non detectable' for buyer confidence. A small number of heifers display light warts on the face. This group of heifers responded favourably to calm handling in the yards and presented well for photos and assessment. Note: 2 deck access only.
