Paddock

Rotationally grazed and extensively handled out in the paddock, even coming when called. Some typical nervousness in the yards as you expect from young cattle. All were brought up the race by a single handler without hassles. Mostly sensible on the scales, just a few doing some rocking back and fourth, listed above as slightly stirry.

Handled With	Bikes , On foot , Vehicles
Notable Traits	Traits 2 Head Minor Eye Blemish
Assessor Comments	Renowned doing steers that are sought after annually by repeat bullock producers, often being purchased straight out of the paddock, and regularly by in-house clients. Extensive genetic improvements has been put in to the Jeffcott herd over the years to ultimately produce a fast growing, early maturing bullock with good muscle & softness. Chasing those Bulls with the high 400/600DW & positive growth figures. These long barrelled, deep, shapey baby bullocks will have no trouble hitting optimum weights before putting up any teeth. Steers have had a few late frosts on their backs, and as a result, some are still hanging on to a bit of their Winter coat. Well weaned, and very well educated, coming when called, and often waiting at the gate to be let in to the next paddock. Please see photos and video for full contentment.
