Assessor Comments	A very tidy line of weaned Angus heifers, averaging 282 kg. April/May 2023 drops, which are in the process of being yard weaned. They will remain so up until the point of delivery. These are commercial heifers out of the Tooperangus stud, and are surplus to requirements. The same vendor will have another line of 33 identical heifers from his second nearby property in this same sale. Put the two lines together to make up a semi or light b-double load. A line of 23 lightweights under 260 kg have been drafted out of this line, and would be available for private sale to the successful purchaser, if so desired. A fair number of these heifers are still showing signs of their winter coats, with very few warm days been experienced here to date. The Tooperangus stud is based on Te Mania foundations, with an emphasis in calving ease and high growth rates. A great opportunity to pick up a line of outstanding future breeders.
