Introduced Sheep
Footrot

1-5 sources of sheep have been introduced onto the consignment property in the last 5 years
All consigned sheep are from a flock that is free of Virulent Footrot
Consigned sheep are from a flock that is NOT free of Benign Footrot or Scald
Further Information: Some minor scald in the ewe flock throughout wet winters and springs, very typical of the local area, nothing of any concern. Any sheep or lambs are footbathed if required with great results.
Feet were not inspected at assessment

Assessor Comments	This is a very even line of purpose bred and prepared store lambs. The Paech family have made a conscious plan to market their 2023 drop lambs as top end store lambs. No expense has been spared to ensure that these lambs have a great foundation of management and animal health to be a successful trade for their purchaser. The Paech's have embraced the use of electronic NLIS tags & captured individual weights of all lambs at 85, 110 & 145 days of age. this line is the 2nd top line of 338 out of 1800 lambs born, and have a measured average daily weight gain of 200g/hd/day. Sired by top end Ferndale Poll Dorset rams, that are selected for growth and muscling. The ewe base are a mix of traditional 1st BL/MerX ewes, WSFK/Mer X Ewes & WSFK/BL/MerX ewes. These lambs are well grown and will have the capability to meet either trade or export weights. All lambs are crutched. Highly recommended. please note the vendor a top line of 737 heavier lambs also in this sale.
