Assessor Comments	A well bred line of Angus heifers ex the Breeder. The last few months have been tough enough for these heifers but they are now on the do and ready to power forward. They would suit a backgrounder job or putting away for joining in the future. At assessment there were three heifers with active pinkeye which was on the improve and six heifers with an old cloudy eye that was non detrimental. Active eyes will be assessed at delivery. Majority of these heifers are 15-17 months but there are 9 heifers that are aprox 22 months. These older heifers have never been joined but had a bull get in with them 5 months ago and were pregnancy tested to be sure they were empty - They were bang tailed.
