	Calves generally very good to work through the yards after a good weaning process. 1 steer became agitated when singled out.
Handled With	Bikes , Dogs , On foot , Vehicles
Assessor Comments	Top line of Angus X Angus weaned steer calves. Calves are 10 - 11 mths of age. These steers should respond very well to improved pastures as all the weaning and hard work has been done. Vendor has been breeding Angus cattle for 25 years and always purchases at the top end when buying bulls ensuring the best genetics are filtering through the herd. Steer calves are by Coffin Creek & Booroomooka bulls showing true to type Angus breed characteristics with good bone, length and conformation. Herd has a Pestivirus Vaccination every year Ideal steers to background for the high end Angus grass or grainfed programs. Steers were good to handle through the yards and crush. Note: 1 steer with birth mark patch on inside of off side front leg. Odd blue eye scarring- not considered detrimental.
