Handled With	Calves generally very good to work through the yards after a good weaning process. Bikes , Dogs , On foot , Vehicles
Assessor Comments	Top line of Angus X Angus weaned Heifer calves. Calves are 10 - 11 mths of age. These Heifers should respond very well to improved pastures as all the weaning and hard work has been done. Vendor has been breeding Angus cattle for 25 years and always purchases at the top end when buying bulls ensuring the best genetics are filtering through the herd. Heifer calves are by Coffin Creek & Booroomooka bulls showing true to type Angus breed characteristics with good bone, length and conformation. Ideal Heifers to Keep as Future Breeders with a Wealth of Angus Breeding behind them or to background for the high end Angus grass or grainfed programs. Heifers were good to handle through the yards and crush. Herd is Vaccinated Annually for Pestivirus Note: Odd blue eye scarring- not considered detrimental.
