Notable Traits	Traits 3 Head White belly from navel back		
Assessor Comments	A great opportunity to purchase a nice line of vendor bred Angus x Angus heifers. Antibiotic free and Grass fed. These heifers have plenty of frame and growth to work with and will really respond well to some good feed. They have been running on very short kikuyu with them going through not a great season so far. Heifers are sired by Knowla, Curracabark and Urban Angus bulls. The potential is there to grow out to heavier feeder weights or MSA kill specs. All heifers have been Preg tested empty for full buyers confidence. Heifers averaged 336kg at assessment with LWR 266-426. Please note, 1 heifer appears lame in video, she was fine during drafting and weighing and may just have stepped on a rock in the yard. Will be assessed before loading. Vendor has Steers in same sale to assist with trucking.
