|                    | Very quiet weaners, felt safe walking around them in the yard and they worked through the yards with a minimum of fuss. As you can see from the video they are very quiet to walk around                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                           |                                     |              |  |   |     |   |     |

| Assessor Comments  | A very smart deck of 35 Hereford Steer weaners. Bred on the vendors property at Coolah they have been on agistment at Holbrook for the last 3 months due to seasonal conditions at home. Quiet, easy to handle steer weaners that have grown out well since being weaned. Temperament is a real credit to the vendor. Soft, well coloured steers that show good bone development and will grow out to ideal feeder steers or target the grassfed market. There were a couple of steers that were treated earlier for pink eye & patched. They still have sight in both eyes. The worst eye is shown in the photos. Vaccinated with Bovi-Shield MH-One and up to date with all other animal health treatments. Vendor also has another 3 lots in this same sale, 10 steers and 28 heifers, similar description. |                                           |                                     |              |  |   |     |   |     |
