Notable Traits

	Traits
3 Head	Fluid in scrotum (Soft to handle and not deemed detrimental)
5 Head	Weeping eyes (light scarring)

Assessor Comments	Offering 108 backgrounder steers that averaged 225kg live at assessment. These steers are predominately out of purchased Brahman cross cows and are sired by Angus Bulls. The steers have been all weaned with some being pulled off in October and the remainder of the later calves weaned in early January so have had a month to settle after weaning and start to move ahead. Overall the steers handled well in the yards and are on a rising plane of nutrition going ahead so will suit a backgrounding operation. Please note 3 head were noted with fluid in the scrotum and were checked in the crush and found to be soft to handle and not deemed detrimental. Also, there were 5 steers noted with weeping eyes and 2 with light scarring on one eye.
