	Heifers worked well through portable panel yards, which were noisy and not the best designed at assessment. A very small number were prone to panic a bit in the race and head bale, but settled down on their release.

Assessor Comments	A vendor bred line of good and very good quality Angus and Angus cross weaned heifers. These heifers were weaned in September when vendor was experiencing dry conditions, they have since been on good feed from November 2023 onwards. The heifers have cleaned up in their coat and are moving forward quite well. Most of these heifers have the quality, temperament and shape suitable for breeding purposes, as the vendor has not retained any. All of these heifers would be suitable to background through to feedlot entry weights as a trade, heavy feeder or kill weights given the right conditions. All notable traits have been photographed. Please note vendor also have a line of steers in the sale as well.
