2 Head	White on Udder/Navel

Assessor Comments: These 11 heifers are out of the tops of the drop of the breeding program and were taken out as being slightly shorter in the leg and to make the lead draft a B Double load of 65 heifers in this sale. Herd originally based on females predominantly carrying MillahMurrah and TeMania bloodlines with recent infusions of Dunoon and Mundarlo Angus genetics. PTIC to selected Dunoon and Mundarlo LBW/Short gestation sires to commence calving late March/early April on a tight 6 week joining. Heifers present in excellent calving condition and are very well grown for their age. Note two heifers in this group have white forward of their udder and up to their navel. Great opportunity for any breeder/future breeder to add quality breeding females to their program as opportunities like this rarely arise.
