	Very Good 100%			
Notable Traits	Traits 2 Head Coulor patch on face			
Assessor Comments	On offer are a Superb line 122 SIL Lambpro Primeline Maternal Ewes that are 2.5 year old & average a curfewed weight of 100kg. These Ewes were purchased over 12 months ago off a breeder that has been breeding Primeline sheep on the Lambpro bloodline for over 10 years. Ewes have been running on light native pastures, whilst staying in supreme condition, they are very low maintenance sheep and easy to keep healthy. These outstanding sheep exhibit huge growth, while still maintaining great style they are very solid but certainly not over fat. Ewes are SIL 172% to the Kraywood Poll Dorset Rams (Tattykeel background) & are set to commence lambing in early April for 6 weeks. At scanning the scanner mentioned there were a number of triplets showing amongst the multiples but were only scanned as singles & multiples. They are extremely fertile, having weaned 162% lambs off them last year as Maidens, a lot of triplets also. Great opportunity to purchase a stand alone line of sheep.
