Assessor Comments	300 2019 drop NSM ewes, January shorn. These large frame and solid ewes with good length of body . They have been very productive since being purchased out of Western Australia as part of a dispersal flock. Vendor has consistently been weaning over 100% lambs every year and cutting over 6.5 kg of wool year in and year out. A small amount of these ewes have scaring mid-back which we suspect is from shearing in extreme heat in January. These ewes are ready for a ram of your choice for a later lambing.
