Assessor Comments	Presented here are 33 April /May Drop Angus Steers weaners. These steers were yard weaned in November and are extremely quiet. The Watt cow herd have been based on Moongenilla Bloodlines, with recently bulls used bred by AI from selected commercial cows from Baldrige Commander and now Paratrooper. The cows are from a large framed cow base. These steers were drenched with Cydectin and Vaccinated with 5 in 1 and Selvoin at weaning in November. Normally the steers are sold to local steer fatteners and grown out to export weights. Here is your opportunity to purchase an even line of Vendor Bred Angus Steers that will continue to perform. Buy with confidence.
