	Heifers were very good to handle in the yards with great temperament. No pushing up the race and walked quietly onto the scales and out of the crush patiently. There was only one cow sighted that was more keen to look for a gate but overall very quiet cows. Cows were also very quiet to handle in the paddock.

Assessor Comments	Offering 66 x 66 VGQ heifers and calves that are doing a great job on their calves. The heifers averaged 430kg live at assessment and all calves were individually weighed to average 176kg. These heifers were purchased in from NSW as PTIC to be retained as future breeders but are now being sold as the property they are on agistment at has had little summer rain. They are genuine young breeders that will be an asset to anyone's herd and are a pleasure to handle in the yards. The calves have quite a bit of size about them and once marked won't be long until weanable for a quick cash flow if needed. Please note some fly rub sighted on heifers and two cows treated for pink eye with Opticlox and three calves (one calf had the infection in both eyes, photo taken).
