	Cows were good to handle in most areas of the yards however they did not handle being in the crush a 2nd time after being pregnancy tested earlier in the day. A fair few did thrash around but once they found the rest of the mob they were good to handle in the bigger yards.

Assessor Comments	Buyers a road train load of medium to large frame cows that present in mainly store to forward store condition. These are best described as Composite cows and photos/video will give buyers an accurate indication of their breed makeup. They are all PTIC 4-8 months to the same sires as their weaners in the Weaner & Yearling sale, again photos/videos will provide an accurate assessment of the progeny these will have. The cows have enough frame for buyers to do a fatten and split job on at a later date. It must also be noted that only about 10% of this line are older than 9 years so there is still some future breeding to be had from these cows. These have not had any chemical pre-treatments so would be a better option to buyers in a tick area. They have been in hand for a week so I think these would benefit from being left alone at a new destination in preparation for calving. Be aware there is also a two-deck lot of cows by the Brangus bull in this sale, buyers urged to buy both lots.
