Assessor Comments	Buyers a load of medium to large frame cows that present in mainly store to forward store condition. These are best described as Composite cows by Brangus bulls. Photos/video will give buyers an accurate indication of their breed makeup. They are all PTIC 4-8 months to the same sires as their weaners in the Weaner & Yearling sale, again photos/videos will provide an accurate assessment of the progeny these will have albeit most should be black you would think. The cows have enough frame for buyers to do a fatten and split job on at a later date. It must also be noted that only about 10% of this line are older than 7 years so there is still some future breeding to be had from these cows. These have not had any chemical pre-treatments so would be a better option to buyers in a tick area. They have been in hand for a week so I think these would benefit from being left alone at a new destination in preparation for calving. Be aware there is also a road train lot of red cows in this sale.
