Assessor Comments	A fair through to very good quality line of rising 4-6 years old cows. They are vet pregnancy tested in calf to Raff Angus bulls with a mix of blue and red taggers. They are mostly medium to large frame and are in store condition. The cows were yarded on Sunday and had good quality weaners removed that day. They were then kept in yards until preg testing on Monday and then were in the yards the night prior to assessing on hay and water. The assessed weight was considered a curfewed weight. The cows are in calf to good quality Raff Angus bulls (ID's provided) which were selected for high growth. This line has the same joining as the other lots in this sale but are joined to a different set of Angus bulls. These are functional cows in calf to quality Angus bulls who have reared two calves and are PTIC with their third calf and have years of breeding left ahead of them.
