Handled With	Overall good cattle to handle, particularly in a paddock. Some heifers got a little stirred up when moving through the yards. Bikes , Dogs , Horses , On foot , Vehicles
Assessor Comments	Here is a nice line of Droughtmaster cross heifers PTIC 1-6 months with only four heifers under 4 months of pregnancy. These heifers average 456kg at assessment and currently have good size calves at foot that will be weaned off heifers at delivery. Cattle are PTIC to Angus bulls (Bowen and Booragul bloodlines). Heifers display good frame & depth and are good milky types & are great cattle to handle in the paddock. Vet certificate displayed in photos. Intending buyers please note that the second last picture is of their calves that will be weaned off them at delivery and are not included in sale. N.B one heifer has a vaccine lump on neck.
