Assessor Comments	Lead draft of replacement future breeders, packed with genetics and PTIC to selected Dunoon and Mundarlo Angus LBW/Short gestation sires to commence calving mid May on a tight 8 week joining period of 10/8 - 5/10. Herd was originally based on females predominantly carrying MillahMurrah and TeMania bloodlines with recent infusions of Dunoon and Mundarlo Angus genetics. Heifers present in excellent calving condition and are very well grown for their age. Great opportunity for any breeder to add quality breeding females to their operation or to establish an excellent base for future breeding programs.
